This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations (optional): In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

Recommendation:

Based on the control and compliance assessment, Botium Toys should prioritize the implementation of the following security measures:

1. Implement a least privilege access policy
2. Implement a strong password policy and password management system
3. Implement regular data backups and disaster recovery procedures
4. Implement encryption for sensitive data
5. Improve network security monitoring

6. Strengthen compliance with PCI DSS and GDPR
7. Establish and document security policies
8. Regularly review and update security controls

Priority

The highest priority should be given to access control, password security, data protection, backups and disaster recovery, and compliance with PCI DSS and GDPR. These measures would reduce the risk of unauthorized access, data breaches, data loss, and regulatory non-compliance while improving Botium Toys' overall security posture.
